## HOBBIES

## JAVIER HERNANDO BOLLAIN

I'm a Game Designer and a Telecommunication Engineer based on Madrid. Generally I focus on combat and systems design. In addition to these disciplines I have taken part in another areas such as level, sound, character design... Throughout my projects, I have been responsible for overseeing the design team and coordinating with other areas such as programming and the different art divisions. I have professional experience as developer of mobility solutions and server maintenance. I love working with people who believe that good things need passion, time and effort.
